

Comunidade Terapêutica Shalon & Life

This facility uses the Minnesota program to provide drug and alcohol rehabilitation. They treat not only the person, but the whole family. Last year 1,500 people attended classes at the institution. Currently they have over 100 people being treated.

For the first 90 days of treatment, the people must live at the facility. They currently have 20 people living there. It takes approximately 2 years for them to complete the program. The Prefeitura does give them some help but they also rely on donations from other companies, the Lions club and MIWC.
